## PORTFOLIO

Key project experience

Kaleidocode is especially proud of two specific projects in the enterprise development space;

- **RefCheck Advanced** – this industry leading reference checking solution was completely redesigned by the KC team. Boasting an optimized user experience as well as a myriad of new features, KC managed the project from end to end including Analysis, Project Management, Architecture and Development. Built with HTML5, C#4.0, ASP.NET, nServiceBus and SQL2008
- **Agrista Enterprise** – The KC team created and developed this performant facilities ERP for credit providers in the agricultural space. Includes CRM, Accounting, Transactions, Asset Management and a great deal more. Built with C#2.0/3.0/3.5/4.0, ASP.NET, SQL2008

## PLATFORMS

Broad range of skillsets for varied applications

Kaleidocode's multi-skilled team have worked in a number of verticals; banking, BPO/contact centres and legal environments. This versatility not only ensures that the team develops new technical skills consistently but that they are exposed to varying business environments. The KC team is able to adapt depending on the business environment, but are skilled in ;

- C#, ASP.NET, WPF, SQL Server, Graph Databases
- HTML5, CSS, jQuery, Javascript, NodeJS
- JQuery Mobile, Phone Gap, Xamarin, Objective C

## METHODOLOGY

Technical approach

Kaleidocode executes projects using agile development techniques as in;

- Time-boxed iterations that encourage rapid and flexible responses to changes in client requirements.
- Employing industry defined software patterns.
- Agile Database design.
- Continuous Testing and Integration.
- Automated releases.

## WHY KALEIDOCODE?

Enterprise Development Specialists

Kaleidocode breathes large scale heavily trafficked corporate systems, drawing off enterprise service bus and service orientated architecture design experience. Developing our own frameworks and leveraging these with best of breed 3<sup>rd</sup> party platforms, we repeatedly integrate into secure legacy systems, be it banking, knowledge systems or sales systems.
