- TURNKEY SOFTWARE DELIVERY
- MOBILE APPLICATIONS
- SOFTWARE ASSURANCE (QA & DBA)

EXPERIENCE

- LEXISNEXIS REFERENCE CHECKS
- ABSA LOAN MANAGEMENT
- REWARDS BPO SYSTEMS
- MARRIOTT UNIT TRUSTS

With the staggering odds against successful delivery of software development projects when using outdated methods and under resourced teams, it's no surprise that Kaleidocode has been approached to remedy 3rd party and in house projects and thereby has developed a solid portfolio of project rescue work for various clients across multiple industries.

DEEP AND VARIED SKILLS

Broad range of skillsets for varied applications

Kaleidocode's multi-skilled team have worked in a number of verticals from banking to marketing and call centres to legal environments. This versatility not only ensures that the team develops new technical skills consistently but that they are exposed to varying business environments on a regular basis. In short the ability to adapt to your working environment, and pick up a disrupted project, is what our team does best. The KC team is able to adapt depending on the business environment, but are skilled in ;

- C#, ASP.NET, WPF, SQL Server, Graph Databases
- HTML5, CSS, jQuery, Javascript, NodeJS
- JQuery Mobile, Phone Gap, Xamarin, Objective C

BULLET PROOF APPROACH

Methodologies

Kaleidocode executes projects using agile development techniques like;

- Time-boxed iterations that encourage rapid and flexible responses to changes in client requirements.
- Employing industry defined software patterns.
- Agile Database design.
- Continuous Testing and Integration.
- Automated releases.

What this means for our clients is that they can quickly see results as we release frequently and regularly, thus ensuring that the plan is adhered to, and that the business has the opportunity to make necessary changes while we are still in the development.

Our project rescue services include;

- Brownfield project take-overs
- Architectural reviews and re-designs
- Code reviews
- Quality assurance reviews and implementations
- Project management and business analysis services

WHY KALEIDOCODE?

Enterprise Development Specialists

Kaleidocode breathes large scale heavily trafficked corporate systems, drawing off enterprise service bus and service orientated architecture design experience. Developing our own frameworks and leveraging these with best of breed 3rd party platforms, we repeatedly integrate into secure legacy systems, be it banking, knowledge systems or sales systems.
